

## Instructions for disposal

Products that have been labelled with a crossed out rubbish bin symbol may not be disposed of as general household waste at the end of their service life.

Our products/assemblies contain valuable materials that can be recycled and should be brought to a recycling centre to prevent any damage to the environment and/or human health from the uncontrolled disposal of waste. Please therefore dispose of the product/assembly via appropriate collection systems or via an appropriate waste disposal company. The product/assembly can then be used for the recycling of materials.

Please help us in protecting the environment and conserving resources - THANK YOU!
